SUMMARY

I am a final-year Computer Science student specializing in Multimedia Computing at Universiti Malaysia Sarawak (UNIMAS), with hands-on experience as a Threat Intelligence Analyst Intern at EC-Council Cyber Defense (ECCCD). Passionate about the intersection of technology and security, I have developed practical skills in backend development, threat intelligence analysis, and full-stack software projects. Through active participation in faculty and university activities, I have strengthened my leadership, teamwork, and organizational abilities. I am eager to apply my technical and analytical skills professionally while continuing to grow in the fields of software development and cybersecurity.

WORK EXPERIENCE

Threat Intelligence Analyst Intern, EC Council Cyber Defense Feb 2026 - Aug 2026

- Authored ECCCD-format threat intelligence advisories on critical CVEs and active threat campaigns, covering exploitation vectors and remediation guidance.
- Investigated emerging threats, including a Phishing-as-a-Service platform, applying strict sourcing standards and clearly flagging intelligence gaps in client-facing reporting.
- Analyzed CVEs across attack flow, affected products, and mitigation strategy, while identifying and neutralizing prompt injection attempts in source materials.
- Owned the backend of a Monthly Report Automation Platform, diagnosing and fixing a data misalignment bug and redesigning the document parsing engine to convert Word templates into publish-ready PDF reports.

Sales Admin Assistant, Jaya Nets Sdn. Bhd. May 2023 - September 2023

- Processed customer orders and managed logistics documentation using Microsoft 365 and digital record systems.
- Communicated with international clients and coordinated information across departments to ensure smooth operations.
- Utilized digital tools to organize data and streamline administrative workflows, improving overall efficiency

EDUCATION

BSc (HONS) Computer Science in Multimedia Computing Oct 2023 - Present

Universiti Malaysia Sarawak

- CGPA: 3.42
- Relevant Coursework: Data Structure and Algorithms, Object Oriented Software Development, Database Concept and Design, Web Application Development, Mobile Application Development, System Analysis and Design, Computer Architecture, Communication and Computer Network, Operating Systems, Java Programming, UI/UX Design

STPM Jul 2021 - April 2023

Kolej Tingkatan Enam Sri Istana

- Physics, Chemistry, Maths T and Pengajian Am
- Maths T Coursework: Conducted statistical simulations and analysis of Normal and Chi-Squared distributions using Excel, including confidence interval estimation and hypothesis testing

PROJECTS

Monthly Report Automation Platform

- Built the backend (Node.js/Express) for an internal tool that parses analyst-filled Word templates into structured, publish-ready PDF threat intelligence reports
- Diagnosed and fixed a table-position-based data misalignment bug by redesigning the document parsing engine (JSZip, xmldom, XPath) and appendix/IOC extraction logic
- Developed API routes for the full upload, preview, confirm, and archive workflow, plus data validation and automatic timestamped archiving

LukoHub – Client Web Application

- Designed and developed a real client website using HTML, CSS, and JavaScript, with Firebase integrated for authentication and data handling
- Implemented responsive frontend interfaces and application logic to meet client requirements; deployed via GitHub Pages

Pokémon Explorer – React & API Integration

- Built a modern web app using React 19 and Tailwind CSS v4 to explore the PokéAPI, with modular components including a paginated list view and detail modal
- Implemented real-time search, multi-type filtering, and animated stat bars; optimized performance with Vite and lazy loading

Android Mobile Application

- Developed an Android app in Android Studio with a complete Firebase Authentication flow (registration, login, forgot password) and Firebase Storage for image handling
- Designed the UI and implemented application logic in Java; tested using the Android Emulator

LEADERSHIP & ACTIVITIES

Treasurer, ARTKAL Club, Universiti Malaysia Sarawak (UNIMAS)

- Managed club finances and ensured transparent budgeting
- Served as designer for the club's fashion show, which won first place

Secretariat, Student Interaction Room, Faculty of Computer Science and Information Technology

- Supported faculty events and student engagement

Participant, International STEM ConnectHER Networking

- Engaged in global discussions on science, technology, and innovation

Liaison Officer, Event Citrawarna 2025

- Managed logistics to ensure smooth, issue-free event operations

ADDITIONAL

- **Programming Languages:** Java, JavaScript, PHP, HTML, CSS, SQL, Python, C++, C, R
- **Software and Tools:** Node.js, Express, Firebase, Git/GitHub, Figma, Unity, Android Studio, Visual Studio, XAMPP, Cisco Packet Tracer, Ubuntu, Microsoft 365, PptxGenJS
- **Threat Intelligence Tools:** VirusTotal, Feedly, NVD, ANY.RUN, Blueliv, RiskRecon, Cyfirma, Cyble
- **Core Competencies:** Team Collaboration, Effective Communication, Problem-Solving Skills, Adaptability, Time Management
- **Languages:** English, Tamil, Bahasa Melayu
